

# ELECTRIC BICYCLE

## ELECTRIC BICYCLE

The 26" bicycle with front and rear suspension and 350 watt electric hub motor can cruise at 25 kph without pedaling\*. The powerpack of 36V-8Ah NiMH (nickel-metal hydride) batteries will allow for upto 20 kilometers on a charge.

It is complete with headlight, horn and battery charge indicator. Street legal in most jurisdictions. For electric motor power the key must be on and the bike either pedaled or the twist throttle operated.

\*Duration of battery depends on person's weight and also on how much the person pedals.

## **90 DAY WARRANTEE.**

If anything should go wrong with the bicycle AND it is because of a manufacturing defect (not by damage caused by the customer) we will replace or repair the defective component free of charge, but shipping of defective component is paid by the customer.

\*\*\*Additional shipping charges apply outside of continental US.
