

ELECTRIC BICYCLE KIT

Motor

Controller

Swivel handle

Charger

Battery case

This powerful electric hub motor kit (brushless motor) can be installed on almost any bicycle. Powered by a powerful **500 Watt, 48 volt** motor.

The kit includes front wheel with hub motor (and safety bracket), key ignition/controller, swivel handle (with battery strength meter), charger and a 48V SLA battery pack.

Installation required. (Can install yourself or give to a bicycle shop).

90 DAY WARRANTY

ATTENTION: Kits are intended to be installed at your nearest bicycle shop or from individuals that are familiar with basic bicycle maintenance or are good do-it-yourselfers.

If anything should go wrong with the kit AND it is because of a manufacturing defect (not an installation error) we will replace or repair the defective component free of charge, but shipping of defective component is paid by the customer.

***Additional shipping charges apply outside of continental US.
